

THE PREDICTIVE, AI DRIVEN SOFTWARE SOLUTION FOR FORWARD -THINKING PROJECT LEADERS

EXEPRON ANNUAL WORKSHOP 2019

September 22 - 24, 2019, Hilton WPB, West Palm Beach, Florida, USA

Exepron, the Transformational Leader in Enterprise Scheduling, Resource Management, AI Analytics driving breakthrough PPM performance

Day 1: Overview of Exepron's new User Interface (UI) & the power of Artificial Intelligence (AI) in BIDSS

- **The power of AI is now included in Business Intelligence Decision Support System (BIDSS):** Exepron's predictive Automated AI conducts behind the scene Business Analytics. This valuable AI tool identifies and provides automated recommendations by identifying areas capable of significant increases in productive capacity with the potential to elevate Throughput while focusing investment on resources that will significantly elevate capacity.
- **Advanced Scheduling capability:** Exepron schedules over 40,000 tasks in a single project with our proprietary, advanced Critical Chain algorithm. This places the stability of Exepron's advanced CCPM Scheduling solution in the league of any major scheduling application required for large engineering, construction, fabrication, shipbuilding and aircraft production environments.
- **Global / Enterprise Multi-Account Predictive Resource Planning & Management capability:** Exepron provides visibility of key metrics of current resource utilization, constraint resource loading while predicting future resource requirements across multiple Accounts in an organization. Global / Enterprise Account information provides Analytics for select project groups (departments, products etc.) or combines portfolio information across multiple accounts.
- **Exepron's new, modernized User Interface (UI) plus Exepron Mobile version:** An overview of Exepron's new mobile capability, modernized, intuitive UI with enhanced capabilities and layout.
- **REST API Connectivity:** Exepron's API provides connective capability to most common 3rd Party applications. This includes, SLACK, SAP, SAGE, JIRA, MS Project, MS Excel etc. Exepron's embedded intelligence and Task priority is available to drive collaboration across departments throughout an organization.

Day 2 and 3: Keynote Speaker, Speaker Presentations and Q&A Panels.

Who should attend: Executives, Business Owners, Project Managers, Portfolio Managers, Scheduler, Exepron Users, Consultants and Production Managers desiring to transform your business performance one Division or Department at a time. Network with experienced Exepron Implementers and gain first-hand Insights.
